Technology Used

- **ReactJS** with Typescript for Admin Panel
- NodeJS with Express Framework for API
- **MySQL** for Database

Please follow the below steps to set up the project on your server.

1. Setup the Database (Technology MySQL)

Database configuration could be set up through the admin panel.

Step 1: Connect MYSQL Server

For Accessing Admin use url

https://<YOUR_DOMAIN_NAME>/admin

• Add Database Host Name, Database User Name, Database Password, Database Port to connect with database.

8
Welcome to Matrimony Configuration
MYSQL Configuration Ø Setup Database Setup Complete
Host Name*
Password*
PORT*
Test Connection
Save & Next

Step 2: Setup Database

- Add Database Name or select existing database if you already have the previous version.
- Select the checkbox if you wish to create a new database user..
- Select the checkbox if you wish to install masterData.
- Select the checkbox if you wish to install sampleData.

Velcome to Matrimony Configuration Preve follow below steps to setup MYSQL Configuration O MYSQL Configuration O Setup Database O Yes No Contracted starbase Do you want to create database user? Install Master Data Install Sample Data	7

3. Success

<u>ಹ</u>
Welcome to Matrimony Configuration
Please follow below steps to setup
MYSQL Configuration — Setup Database — Setup Complete
Database Created MasterData Installed
SampleData Installed
Congratulations!
Your configuration process has been successfully completed. Below are your credentials. We appreciate your cooperation in this matter and look forward to your continued success with our services.
Please restart API(Nodejs APP) - Check documentation
Username : admin@admin.com Password: admin1234
Go To Login

Note :- Please ensure to restart the API server after completing the database configuration step in the admin panel before proceeding with the login process.

2. Setup the API, Admin Panel, Website (Technology NodeJS,ReactJS)

Update MatrimonyCMS/matrimony-firebase-adminsdk.json file

"type": "<type>", "project_id": "<project_id>", "private_key_id": "<private_key_id>", "private_key": "<private_key>", "client_email": "<client_email>", "client_id": "<client_id>", "auth uri": "<auth uri>", "token uri": "<token uri>", "auth_provider_x509_cert_url": "<auth_provider_x509_cert_url>", "client x509 cert url": "<client x509 cert url>", "universe domain": "<universe domain>"

- Open the folder and upload it on your hosting server.
- Execute npm i command in server Terminal.
- For Accessing API use url

https://<YOUR_DOMAIN_NAME>/api

• For Accessing Admin use url

https://<YOUR_DOMAIN_NAME>/admin

• For Accessing API use url

https://<YOUR_DOMAIN_NAME>

A. Setup Web App (Technology Flutter)

1. Open

the

MatrimonyCMS\build\Website\assets\assets\jsondata\variable.js on file in the editor Replace with your own parameters.

assets >	assets > jsondata > () variable.json >
	R
	appName": " <your-app-name>",</your-app-name>
	"apiBaseURL": " <your-api-baseurl>",</your-api-baseurl>
	<pre>"imageBaseurl":"<your-api-imagebaseurl>",</your-api-imagebaseurl></pre>
	"version": 1.0,
6	"apiKeyForWeb": "Your key",
	"authDomainForWeb": "*Your Firebase Porject Id*.firebaseapp.com",
	"projectIdForWeb": "Your Firebase Porject Id",
	"storageBucketForWeb": "*Your Firebase Porject Id*.appspot.com",
10	"messagingSenderIdForWeb": "Your message Sender Id",
11	"appIdForWeb": "Your Firebase App Id",
12	"measurementIdForWeb": "Your measurementId",
13	"vapidKey":"Your vapidKey"
14	

- 2. Change Following Firebase keys In Following Path
 - i. PATH : Build/Website\firebase-messaging-sw.js
 - ii. Changeable Keys :

<pre>firebase.initializeApp({</pre>
apiKey: "Your key",
<pre>authDomain: "*Your Firebase Porject Id*.firebaseapp.com",</pre>
projectId: "Your Firebase Porject Id",
<pre>storageBucket: "*Your Firebase Porject Id*.appspot.com",</pre>
<pre>messagingSenderId:"Your message Sender Id",</pre>
appId: "Your Firebase App Id",
measurementId: "Your measurementId",
});

- 3. Change Web Name & Firebase Parameters In Following Path
 - i. Path: Build/Website/index.html
 - ii. Change Your App Name

iii. Change Your Firebase Parameters

- 4. Change Website Icon:
 - i. Generate Icon From this URL:

https://favicon.io/favicon-converter/

ii. Replace the icons in the Build\Website\icons folder as shown in the below image.

5. Upload the Builds/Website folder to your desired location

i.

b. Third-Party Integration

C. Setup Agora

The Agora account is used the make a video call between 2 users in the mobile app.

i. Log in or sign up for the Agora Console
